THE FINANCE CLUB PRESENTS

# DOOMSDAY

## Trailer Storyboard

*Multiverse of Money · 30 seconds · 6 shots*

Each shot is one 5-second clip, the length most AI video tools make in one go.
Short on credits? Make the 15-second cut: shots 1, 2, 5 and 6.

# 1 How to use this

1. Make each shot's still first: paste the **style block** and then the shot's **image prompt** into your image AI (16:9). Attach the reference picture shown with the shot if the tool accepts one, so every shot looks like the event's posters.
2. Turn each still into a 5-second clip with the shot's **motion prompt** (image-to-video).
3. Put the on-screen text in while editing (in Canva, CapCut or similar), not in the AI prompt: AI tools spell text badly. Use the event logo file for the final title.
4. Music: one dark, rising trailer track with a hard hit at 24 s. Add the voice-over lines last.

### Style block (paste before every image prompt)

```
Cinematic dark comic-book art, epic movie-poster lighting, near-black background with toxic acid-green glow, a green solar eclipse in the sky, volumetric fog, high contrast, fine film grain, Indian megacity at night inspired by Delhi (glass towers of Cyber City, Metro viaduct, ancient domes of Hauz Khas, Aravalli hills), 16:9 widescreen, no text, no logos, no letters.
```

### Avoid (negative prompt, where the tool has one)

```
text, captions, watermark, logo, Marvel or DC characters, famous superheroes, real people, celebrities, cartoonish, bright daylight, blue colour cast, extra fingers, distorted faces
```

## 2 The six shots

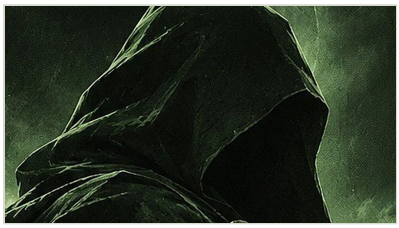

### Shot 1 · 0:00–0:05 · The city

**Picture:** Mahanagar at night; a green eclipse slides over the moon; one by one the skyline's lights flicker green.

**On screen:** 25 NOVEMBER · **Voice-over:** "Mahanagar has one evening left."

```
Wide aerial shot of a vast Indian megacity at night, glass skyscrapers and a lit Metro viaduct, ancient domes in the foreground, a huge green solar eclipse rising over the skyline, city lights turning toxic green, fog in the streets.
```

**Motion:** slow push-in towards the skyline; the eclipse slides into place; lights flicker green from left to right.

### Shot 2 · 0:05–0:10 · The villain

**Picture:** Professor Kalyug, a tall hooded figure with a glowing green gaze, on a rooftop; holographic stock charts crash around him.

**On screen:** PROFESSOR KALYUG HAS A PLAN · **Voice-over:** "Professor Kalyug has announced Doomsday."

```
A tall mysterious villain in a long dark hooded cloak standing on the edge of a skyscraper rooftop at night, face hidden in shadow with two faint green glowing eyes, floating holographic stock-market charts crashing in red and green around him, green eclipse behind, wind in the cloak, menacing and elegant.
```

**Motion:** slow orbit around the figure; charts fall and shatter; he lifts his head towards the camera at the end.

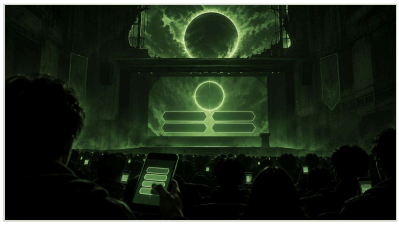

### Shot 3 · 0:10–0:15 · Multiverse of Money

**Picture:** an open briefcase of glowing rupee notes; the notes split into mirrored copies, each showing a different future city.

**On screen:** ₹50 CRORE. ONE HERO. · **Voice-over:** "Fifty crore. One chance to build a hero."

```
Close-up of an open metal briefcase on a dark table filled with glowing green Indian rupee banknotes, the notes lifting into the air and splitting into dozens of mirrored floating panels, each panel showing a different version of the same city (one burning, one golden, one flooded), kaleidoscope multiverse effect.
```

**Motion:** notes rise and multiply outward like a kaleidoscope; camera pulls back.

### Shot 4 · 0:15–0:20 · The rounds (fast montage)

**Picture:** three quick 1.5-second cuts: phones lighting up a dark auditorium; bidding paddles raised in green light; a block tower bursting apart.

**On screen:** QUIZ · BID · BUILD · BLUFF · **Voice-over:** "Think fast. Bid smart. Build big."

```
Split into three dramatic frames: (1) a dark auditorium filled with students holding up glowing phones, green light on their faces seen from behind; (2) hands raising shield-shaped bidding paddles under green spotlights at a night auction; (3) a tower of coloured wooden blocks exploding apart in slow motion as a soft foam ball hits it.
```

**Motion:** hard cuts on the beat; quick zoom on each frame. (If your tool makes one image per prompt, make three images of 1.5 s each.)

### Shot 5 · 0:20–0:25 · The Vault

**Picture:** sealed, numbered envelopes on a table under one lamp; a hand slides one away; a faint green shield shimmers over another.

**On screen:** TRUST NO ONE. · **Voice-over:** “In the Vault, every envelope hides your fate.”

```
Moody top-down shot of a dark wooden table under a single hanging lamp, ten sealed black envelopes numbered E1 to E10 in green ink, a gloved hand sliding one envelope away, a faint translucent green energy shield glowing over another envelope, smoke and dust in the light beam, thriller atmosphere.
```

**Motion:** slow overhead drift; the hand slides the envelope; the shield pulses once.

### Shot 6 · 0:25–0:30 · Title

**Picture:** the eclipse fills the frame and bursts into green light; the DOOMSDAY logo appears (add the real logo in editing).

**On screen:** DOOMSDAY · MULTIVERSE OF MONEY · 25 NOV · THE FINANCE CLUB · **Voice-over:** “Hero… ya zero?”

```
Extreme close-up of a giant green solar eclipse filling the sky over a dark city skyline, the corona flaring into a blinding burst of green light, sparks and embers drifting, empty dark space in the centre of the frame for a title, epic and final.
```

**Motion:** the eclipse pulses and flares to white-green at 0:24 on the music hit; hold on the empty centre for the logo.

## 3 One picture of the whole storyboard

To get a single storyboard sheet (all six frames on one image), paste this into your image AI:

```
A cinematic film storyboard sheet with six numbered 16:9 panels in a 3 × 2 grid on a black page, dark comic-book art with toxic green light. Panel 1: a vast Indian megacity at night under a rising green solar eclipse. Panel 2: a hooded villain with glowing green eyes on a rooftop, holographic stock charts crashing around him. Panel 3: an open briefcase of glowing rupee notes splitting into mirrored floating panels of alternate cities. Panel 4: students holding up glowing phones in a dark auditorium, bidding paddles raised, a block tower exploding. Panel 5: sealed numbered black envelopes on a table under a single lamp, a hand sliding one away, a faint green shield over another. Panel 6: a giant green eclipse flaring into light above a dark skyline. Thin white panel borders, small panel numbers only, no other text.
```

### The 15-second cut

| Time | Shot | Voice-over |
|---|---|---|
| 0:00–0:04 | Shot 1 · The city | “Mahanagar has one evening left.” |
| 0:04–0:08 | Shot 2 · The villain | “Professor Kalyug has announced Doomsday.” |
| 0:08–0:11 | Shot 5 · The Vault | “Trust no one.” |
| 0:11–0:15 | Shot 6 · Title | “Hero… ya zero?” |

> **Keep it original**
>
> No Marvel or DC characters, logos or costumes in the trailer: the event’s own villain, city and agencies only.
